Ginger

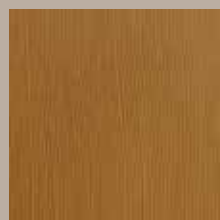

Nutmeg

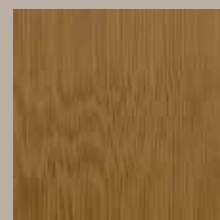

Clove

Available on Fir-Grain "Belleville Collection" Doors (See pages 16, 17, 78 & 79).

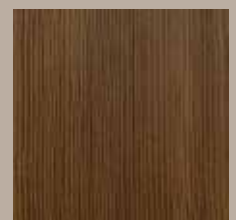

Flush-Glazed "Fir Grain" Stain Colors

Caramel

Toffee

Chocolate

Available on Fir-Grain "Flush-Glazed Craftsman" Doors (See pages 80, 81, 86 & 87).

Why doesn't the color on my product look exactly like it does in the catalog or website?

Due to the limitations of photography, there is no guarantee that your product's colors will have the same appearance as they do in print or online. We always recommend you see an actual sample before deciding on a color choice. Contact a Codel dealer to request a color chip sample.

Codel Fiberglass Doors Distinct Features

With high-impact compression-molded skins that will not splinter, dent, rot or rust, Codel's smooth and textured fiberglass doors are virtually maintenance free. Unlike other brands of fiberglass doors that offer only wood edges, our door is designed with "Hydroshield Technology" and manufactured with full-length matching composite stiles, and high strength composite top and bottom rails. Having no exposed wood is paramount in preventing moisture from seeping into the door. The Codel fiberglass door, when partnered with our WeatherGuard composite frame system, will not only stand up to the elements, but will also provide years of satisfaction.

Finishing Touch

Enhance the beauty and value of your door with any of our quality coatings, for a completely finished & ready-to-install door system. (Optional)

Door Install Screws

Additional 2-3/4" screws come standard with every prehung unit. Install one in the middle and bottom hinge and two in the top hinge for added security.

LVL Stile

Continuous 3-1/4" lock block extending the full length of the lock-side, keeps the door from bowing and improves security.

JambGuard™

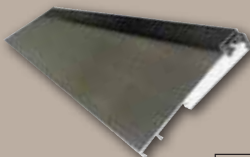

Heavy duty steel reinforcement plate for added protection & security.

(*Not on sidelite or double units.)

Premium High Dam Sill

Provides an improved barrier against air and water intrusion.

Seams-Rite™

Seams-Rite™ is an innovative hidden fastener eliminating unsightly nail holes and provides a barrier against water intrusion.

(Standard on WeatherGuard Jambos only)

Vinyl Nailing Flange

The vinyl nailing flange allows the door to be installed without damaging finished jamb facings. (Optional)(Available on WeatherGuard Jambos only)

Rockwell

MultiPoint Installed
(Optional)

Unfinished Smooth Fiberglass

PFJ Jamb & Brickmould

Our domestic Ponderosa pine door frames are treated with blue acrylic end sealer to prevent wicking moisture.

Corner Seal

Added protection against water and air infiltration.

Continuous Sidelite Sill

Features a high dam barrier for critical weather-tight protection where the jambs meet the sill.

High Performance Sweep

Provides a tight seal against drafts.

High Density Polyurethane Foam

Provides 5 times the insulation value of wood doors.

HydroShield™ Technology

Composite framework seals out moisture and eliminates rot and deterioration.

Efficient

Codel doors provide more insulation value than wood doors; and are more efficient than older, worn-out, drafty doors.

EZ-Fit & New Construction Swinging Patio Doors

Codel's swinging patio door system is an attractive alternative to wood or vinyl sliding patio doors. The standard New Construction (NC) model is perfect for New Construction applications, while the EZ-Fit (EZ) model is a "retro-sized" unit created as a replacement for that worn out aluminum sliding door, making it perfect for remodel projects. Both models are available as an inswinging or an outswinging unit. The "one door fixed/one door active" hinged operation eliminates security and performance issues often experienced with traditional sliding patio doors.

Codel's swinging patio door system is manufactured completely prehung, and is available with an optional Phantom retractable screen installed in your choice of either white or bronze. (Please refer to page 93 for more information on the Phantom retractable screen)

PREMIUM STEEL DOOR

- 24-gauge primed steel skins
- Composite bottom rail
- 12" wood lock block
- Polyurethane core

STEEL DOORS

The wood-edge steel door series is a popular choice for new construction as well as remodeling projects.

The versatility and thermal advantages of a wood-edge door are combined with the durability of 24-gauge steel facings. Units are permanently held in place by the adhesion of the polyurethane core.

After assembly, doors are primed for superior corrosion resistance. Wood-edge steel doors are available with a *20-minute fire rating for all 6'8" doors up to 3'0" wide. (*Excludes doors w/lite kits.)

Thermal Performance values established in accordance with the International Energy Conservation Code (IECC) section 102.3

FAST-FRAME™

Introducing the Ultimate in Adjustable Steel Door Frames

FAST-FRAME'S advanced design adds a new dimension of flexibility and durability to Codel's steel entry door line. FAST-FRAME™ features closure kits with full 1" of adjustability to accommodate almost any variation in wall construction. This easy-to-install, user-friendly, kerfed steel door frame system is applicable to a full range of residential and commercial applications - wood or steel stud construction. FAST FRAME is engineered to meet the most stringent code requirements including structural, impact and 90-minute fire ratings.

Adjustable T-Strike
1/4" of adjustment allows for ease of field installations for proper door closure

Decorative Options for Rustic Doors

Clavos, hinge straps and speakeasies add an authentic touch to your Rustic door.

Straps & Clavos

Clavos

CodeL offers clavos in 1-1/2" round or 1-1/2" square decorative black metal.

The clavos are shipped loose so the customer can apply them on site in the design of their choice.

1-1/2" Clavos and 18" hinge straps can be added to Rustic doors.

Speakeasy

A Speakeasy adds a touch of old world charm. CodeL offers a Seedy Reamy glass door Speakeasy as well as a solid one with a black door. Both seal tightly to prevent air infiltration.

(Size: 10" wide x 12" high.)

Codel Entry Systems offers Multi-Point Locking Systems of the finest design, most precise machining and highest quality materials providing homeowners with a secure locking system stronger than traditional deadbolt locks.

Screw Support

Prevents flexing or bending of the gear for lifetime performance and smoother operation.

Mishandling Device

Prevents multiple locking points from accidentally firing and potentially damaging door trim. Fully field reversible.

Solid Stainless Steel Deadbolt

Highly corrosion resistant and stronger than traditional deadbolts.

Manual Tongue (Top & Bottom)

While offering security in the locked position, the manual tongue engages into the jamb or mull post and retracts when opened, giving a smooth, clean appearance.

Flush Bolts (Top & Bottom)

(Optional) Multi-Point is available for the inactive door. The flush-bolts operate by the handle on the in-active panel, sending the flush-bolts simultaneously into the head and sill, offering a smooth and easy operation and securing your entry door.

Outswing "Bumper" Sill

DOORGUARD / SILLGUARD / JAMBGUARD

DoorGuard was developed by Codel Entry Systems to provide protection of the door during delivery, and installation. Cardboard protects both faces of the door, and the corners of the brickmould from damage; and plastic shrinkwrap helps keep the door clean.

SillGuard is a durable plastic sill cover that protects the sill from damage and jobsite debris.

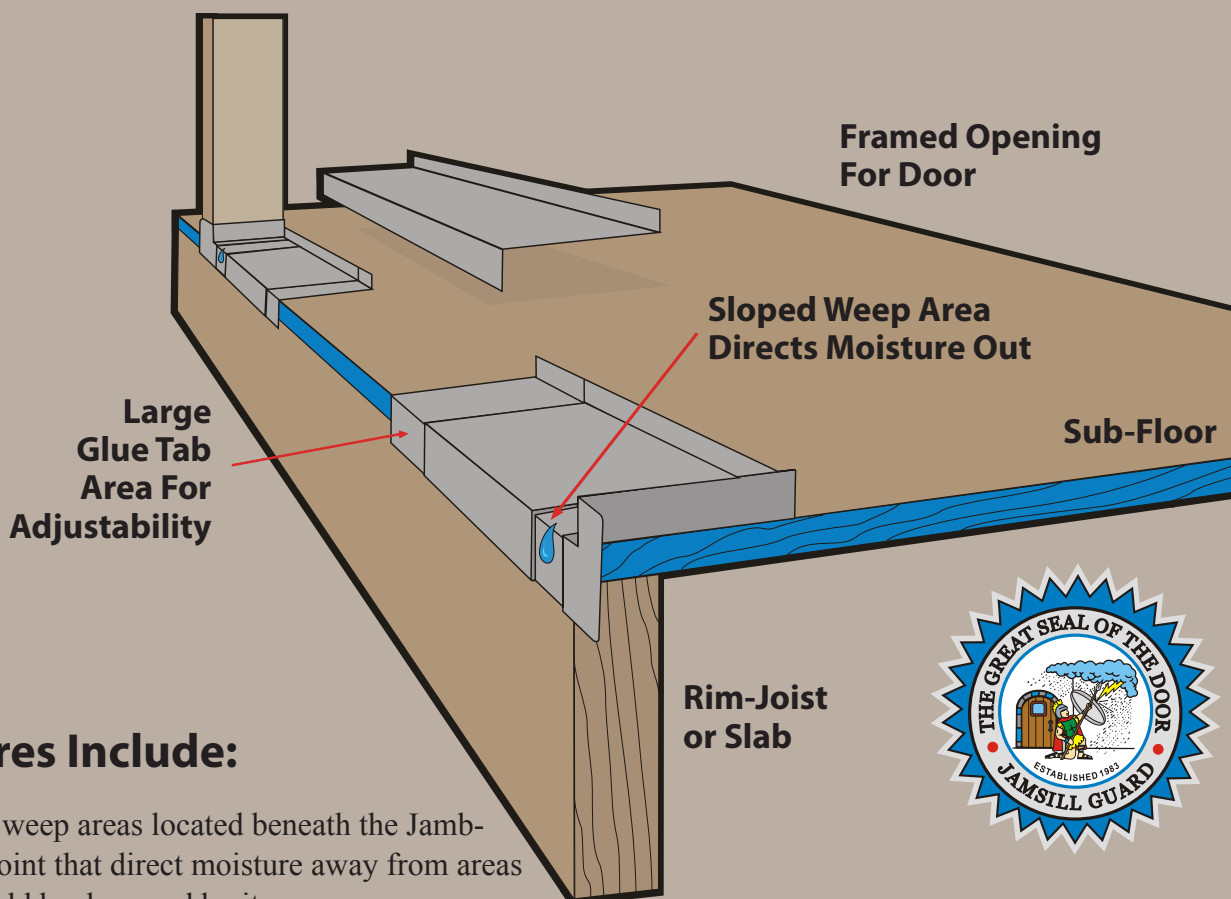

JambGuard is a steel reinforcement plate that is installed to the backside of the jamb, at the deadbolt location, on a single prehung door. This provides greater strength to the jamb against break-in force.

PROTECT YOUR DOOR FROM LEAKING

Jamsill Guard®

The ORIGINAL Sill Pan Flashing Since 1983!

Adjustable Sill Pan Flashing For Doors

Features Include:

- Sloped weep areas located beneath the Jamb-to-sill joint that direct moisture away from areas that could be damaged by it.
- Durable weather-resistant material impervious to rust, corrosion, galvanice corrosion electrolysis and corrosive coastal areas.
- Depths to accommodate most door applications in either 2x4 or 2x6 construction.
- Easy installation with the multiple-piece design.

Jamsill Guard® is an adjustable sill pan flashing designed to prevent water damage from door leaks. Made from quality, high impact ABS plastics, Jamsill Guard® will not deteriorate or corrode over time. Jamsill Guard's simple design is inexpensive and easy to install. Their multi-piece telescoping design allows on-site adjustability to fit all rough openings and features sloped weep areas to help evacuate moisture to the exterior of the structure. Jamsill Guard® is bonded together in the field using PVC cement, creating a one-piece sill pan flashing beneath your door.

Failure to install a sill pan will void any warranty against leaking.

Legacy Master LEG-440 door, LEG-240 sidelites and LEG-30212 transom.

Codel WeatherGuard Composite Frame System is an innovative alternative to traditional wood jambs. This poly-fiber doorframe system combines all the strength and convenience of wood with enhanced properties that make it moisture, rot and insect resistant. This unique formulation guarantees that the WeatherGuard frame will not absorb or wick moisture and will never warp, splinter or rot.

The WeatherGuard product line is available in two varieties. White Cap is a smooth, semi-gloss white that can be painted or left unfinished to compliment the Codel Smooth Fiberglass door. Textured has an embossed grain that can be painted or stained to compliment the Codel Textured Fiberglass door. The advanced WeatherGuard system can be installed the same way as traditional wood jambs.

Exclusive to WeatherGuard is our patented “Seams-Rite” spline that enables the brick-mould to be applied to the jamb without using nails. Besides eliminating nail holes, “Seams-Rite” ensures a continuous water barrier. An optional nailing flange is also available.

White Cap

4-9/16, 5-1/4, 6-9/16, 7-1/4

2" Brickmould

Textured Embossed

4-9/16, 5-1/4, 6-9/16, 7-1/4

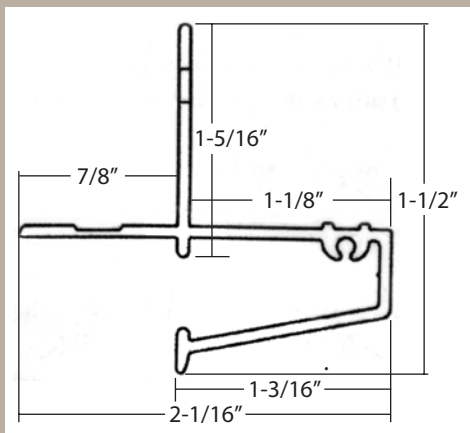

2" Brickmould

Features & Benefits

- Poly-fiber composite jamb system is an attractive, affordable, and low maintenance option to traditional wood.
- Closed cellular structure is a unique formulation that ensures product will not warp, split or absorb moisture.
- Greater screw holding power than wood.
- Installs the same as traditional wood jambs.
- Available in smooth semi-gloss white cap and stainable textured embossed.
- Matching mullposts offering sidelite and transom capabilities.
- Installation and finishing recommendation label applied to every frame.
- Limited lifetime warranty.

ALUMINUM NAILING FLANGE

Striking the perfect balance between durability and function, Codel's Aluminum Nailing Flange not only replaces traditional exterior brickmould with a streamlined profile that is weather-resistant and virtually maintenance free, but also reduces installation time, and works as a barrier against air and moisture infiltration. This white Aluminum Nailing Flange can be left as is, or can be painted any one of our standard paint colors, providing the flexibility to match most exterior color schemes.

Features & Benefits

- Reduces install time
- Made of heavy gauge aluminum for strength and durability
- Eliminates the need for visible fasteners
- Provides a surface to use flashing tape for the best seal
- Slimline brickmould provides a clean transition for all siding applications
- Can be left white or painted any of our standard paint colors
- Can be used on Primed, WeatherGuard, or Hemlock Jambs

Olive

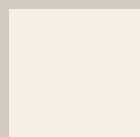

Espresso

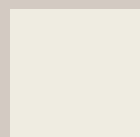

Truffle

Sand

Bright

Ivory

Why doesn't the color on my product look exactly like it does in the catalog or website?

Due to the limitations of photography, there is no guarantee that your product's colors will have the same appearance as they do in print or online. We always recommend you see an actual sample before deciding on a color choice. Contact a Codel dealer to request a color chip sample.

Contemporary Classic Paint Colors

Exciting colors designed to compliment our Contemporary Classics Collection, but use them on ANY Codel Smooth or Textured Fiberglass door to add a pop of color, no matter the style of your home!
