

WINCHESTER

AVAILABLE EXCLUSIVELY AT

Windsor Plywood®

Why Vinyl?

Vinyl flooring has quickly become the most requested flooring option for homeowners. It is an affordable alternative to hardwood or laminate flooring, and offers a wide range of features and benefits.

Benefits of Vinyl Flooring

All vinyl products are ideal for areas not suitable for laminate or hardwood, such as kitchens, bathrooms and basements. Commercial products are also perfect for hair salons, offices, restaurants and hotels.

Easy do-it-yourself installation, with a variety of installation types available depending on the user's skill level.

Vinyl flooring can be installed in almost any room, over almost any existing floor on, at or below grade.

Today's high quality printing capabilities allow us to create decors that look just like real wood, stone, slate or ceramic. Hundreds of realistic patterns and colors are available.

Because it is hygienic and easy to clean, resists scuffs and stains, and is sound absorbing, vinyl flooring is the perfect choice for families with kids or pets.

Vinyl's softness and warmth provides comfort, especially when standing for long periods.

Unlike laminate or engineered flooring, all our vinyl products are independently verified to be free of formaldehyde and VOCs. Virgin vinyl is also always free of ortho-phthalates.

Options Available

Installation Types

Premium glue down/loose lay
Self-locking (Vinloc)

Sizes and Thicknesses

Our sizes are 7.25" x 48" and 8" x 48" for premium glue down/loose lay planks, 6" x 36" and 6" x 48" for self-locking planks, and 12" x 24" for self-locking tiles.

The thickness of the vinyl promotes its structural integrity. Premium glue down/loose lay have a 5 mm thickness. For self-locking planks, thicknesses range from 10 to 10.5 mm.

Wear Layers

The wear layer is critical for the performance and durability of the product once it is installed. Both premium glue down/loose lay and self-locking products are available with a 0.5 mm wear layer, which is commercial quality. Self-locking products are also available with 0.15 and 0.2 mm wear layers for residential uses.

Finishes

We offer a variety of textures to create a natural looking plank or tile. Embossing enhances the long-term appearance of the product.

Finishes available include:

Handscraped and light handscraped
Wood grain embossing
Embossed coral or slate

Edges

Beveled edges provide a more authentic appearance, while square edges create a seamless transition between pieces.

Consumer Warranties and Customer Support

Consumer warranties and customer support are integral components of our products. Competitive or better warranties are the norm and they are backed by a company capable of it. We also have a well trained team of customer service agents, and a website with consumer support features like FAQs and installation videos.

For vinyl products, our warranty is based on the wear layer:

WEAR LAYER THICKNESS	CONSUMER WARRANTIES	
	RESIDENTIAL	COMMERCIAL
0.5 mm (20 mil)	Lifetime	17 Year
0.2 mm (8 mil)	15 Year	6 Year (Light)
0.15 mm (6 mil)	10 Year	5 Year (Light)

Definitions

Residential: Kitchen, Bedroom, Dining Room, Recreation Room, Foyer, Bathroom

Light Commercial: Small Retail Shop (up to 200 ft2), Waiting Room, Trade Show Booth, Small Office

Commercial: Restaurant, Large Retail Shop, School Classroom, Large Office, Nurses' Station, Hair Salon (Working Area), Assisted Living Facility

Care and Maintenance

Vinyl flooring is very easy to clean and maintain. These are the guidelines that we recommend to consumers.

Avoid exposure to direct sunlight for prolonged periods of time. Use drapes or blinds to minimize direct sunlight during peak sunlight hours. Surface temperature should never exceed 84° F (29° C).

If using an adhesive to install a premium glue down/loose lay floor, clean up any remaining or spilled adhesive with a damp cloth when finished. Allow the perimeter planks on a premium glue down/loose lay floor to adhere to the sub floor for 5 to 7 days before cleaning.

Sweep regularly to remove surface grit and dust. Use a damp cloth or mop to clean up any dirt and footprints. All spills should be cleaned up immediately. CAUTION: Planks are slippery when wet. With premium glue down/loose lay products, avoid using excessive amounts of moisture, as this may cause bond failure for the adhesive.

Never use wax, polish, abrasive cleaners or scouring agents as they may dull or distort the finish.

Do not allow pets with unclipped nails to scratch or damage the floor.

High heels can damage floors.

Use protective pads under furniture.

If it becomes necessary to move any heavy fixtures or appliances over the flooring on casters or dollies, the flooring should be protected with 1/4" (0.64 cm) or thicker plywood, hardboard or other underlayment panels.

Use doormats at entrance ways to protect the floor from discoloring. Avoid using rubber-backed rugs, as they may stain or discolour the vinyl flooring. If you have an asphalt driveway, use a heavy-duty doormat at your main door, as chemicals in asphalt can cause vinyl flooring to yellow.

It's a good idea to save a few planks in case of accidental damage. Boards can be replaced or repaired by a flooring professional.

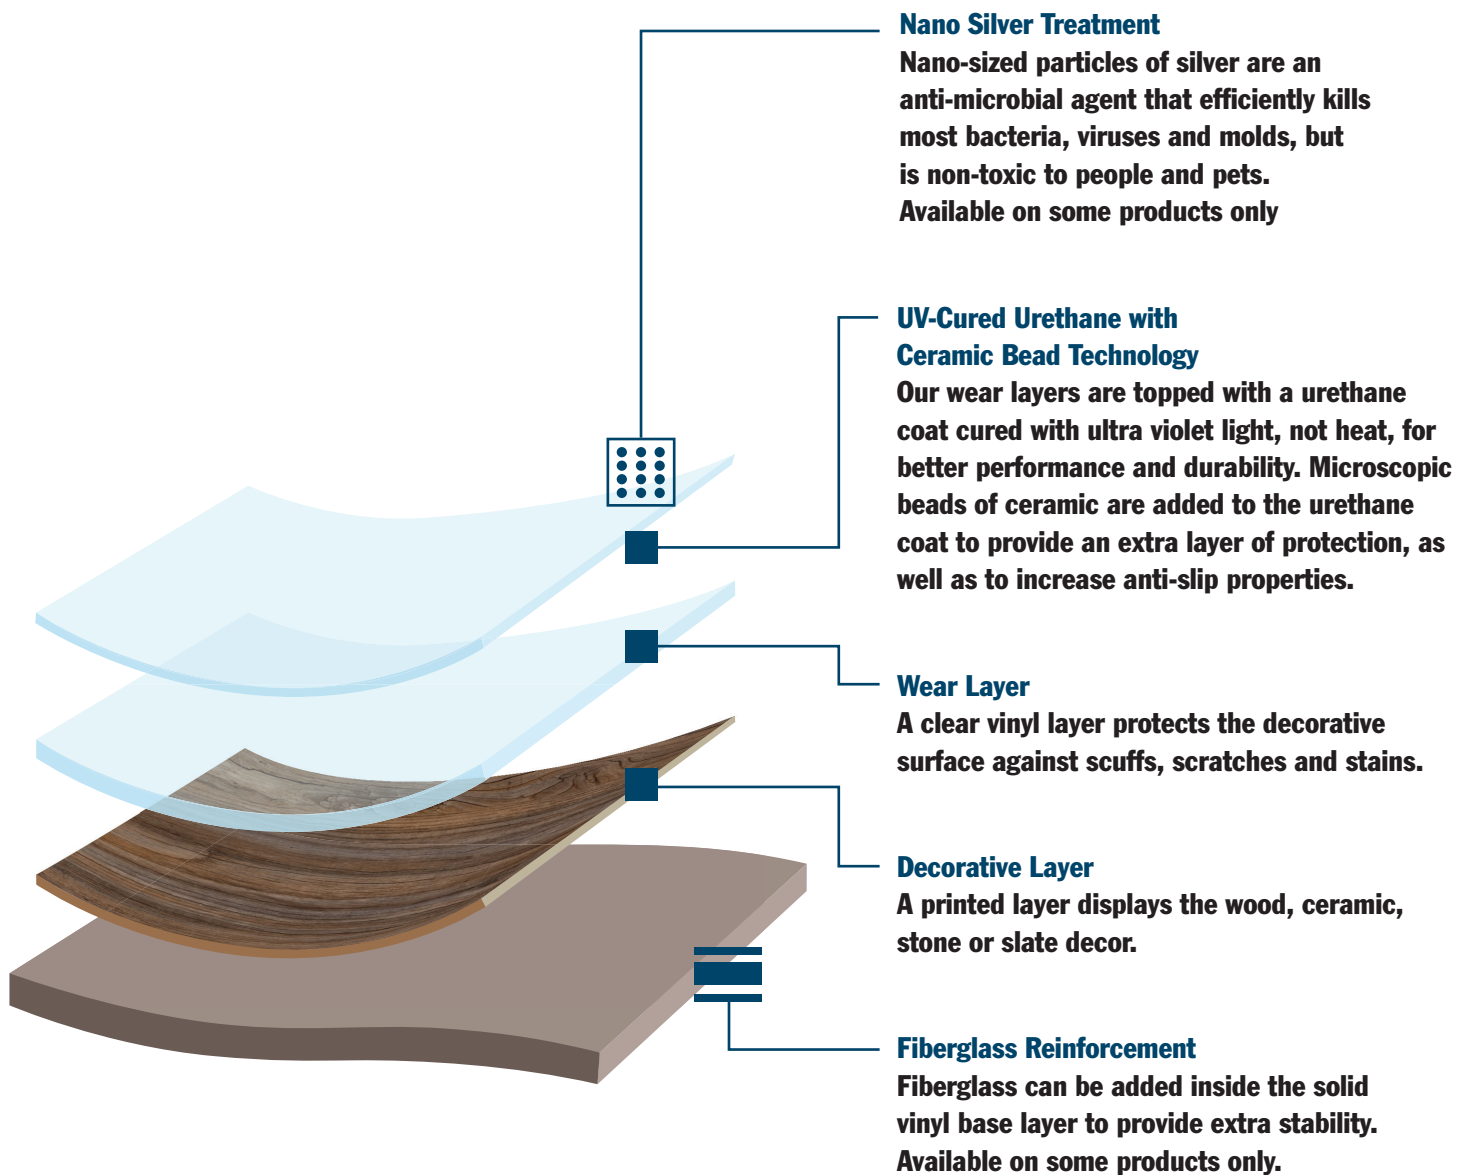

Premium Glue Down/Loose Lay Vinyl Plank

You can install premium products either glue down for a permanent installation or loose lay for a quick, easy installation.

A non-slip traction backing keeps the planks or tiles where they are placed.

Our premium vinyl is sound rated to IIC 67, so it can be installed in multi-family units.
