

SIMPLE KIDS

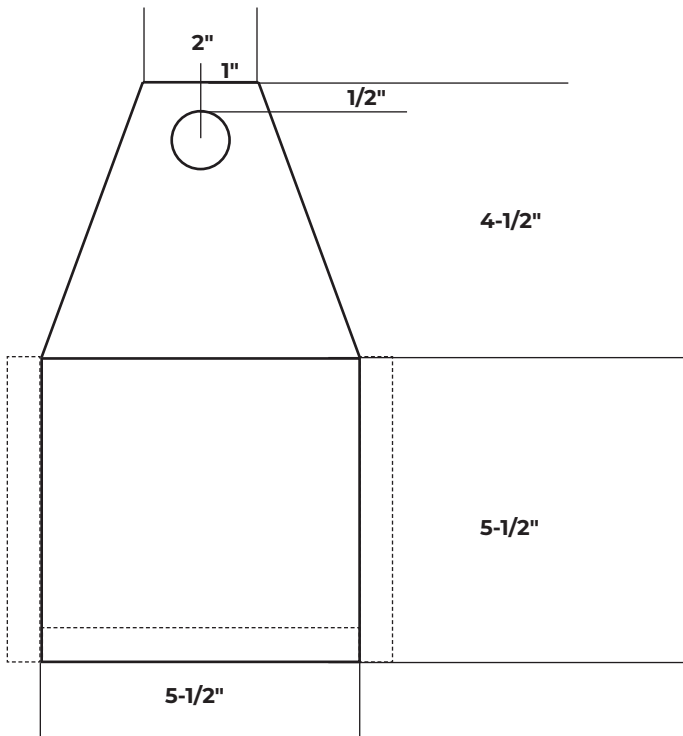

Toolbox Plans

A great toolbox for all the little handy people in your house. Fun to paint and decorate with their favourite stickers

Board Cut Diagram

End Piece Diagram

Tools:

- Miter Saw or Circular Saw
- Jig Saw
- Pencil
- 1" Drill Bit
- Drill
- Hammer
- Measuring Tape
- Clamps

Materials List:

Material	Quantity
1 x 6 x 8'	1 Boards
1" Dowel	1
Finishing Nails	Box
Paint	1 Small Can

Build Instructions:

1. Start by trimming off the rough end of the 1 x 6 boards with your miter saw.
2. Follow the cut diagram for the producing all the pieces required.
3. On the two end pieces you will need to mark the centre of the board and measure and mark 1" out from that centre line. Draw lines from the marks down to the outside edge of the board as indicated in the end piece diagram.
4. Drill a 1" hole 1/2" inch down and in the centre of the piece.
5. Using finishing nails attach the end pieces to the ends of the 16-1/2" bottom piece.
6. Flip the box on its side and attach to side pieces to the ends and bottom with more finishing nails.
7. Cut the 1" dowel to 20" and slide through the holes on the end pieces to make the handle. Add a small amount of wood glue to keep it from moving.
8. Paint and decorate however you like.
